

NXT Gas Solutions offers natural gas membrane solutions through its exclusive relationship with Air Liquide.

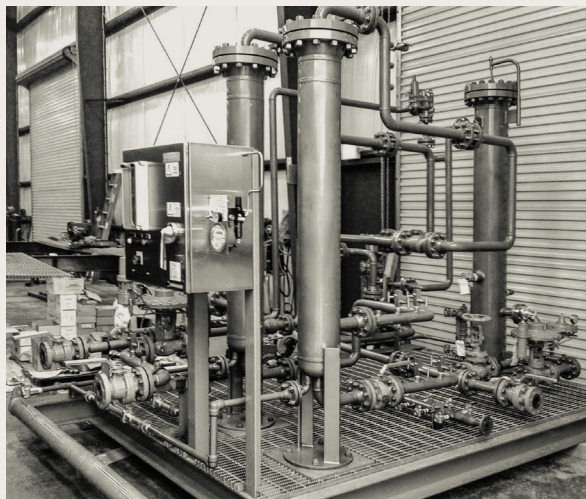

Robust, high performance hollow fiber membranes for gas separation

Natural Gas Membrane Solutions

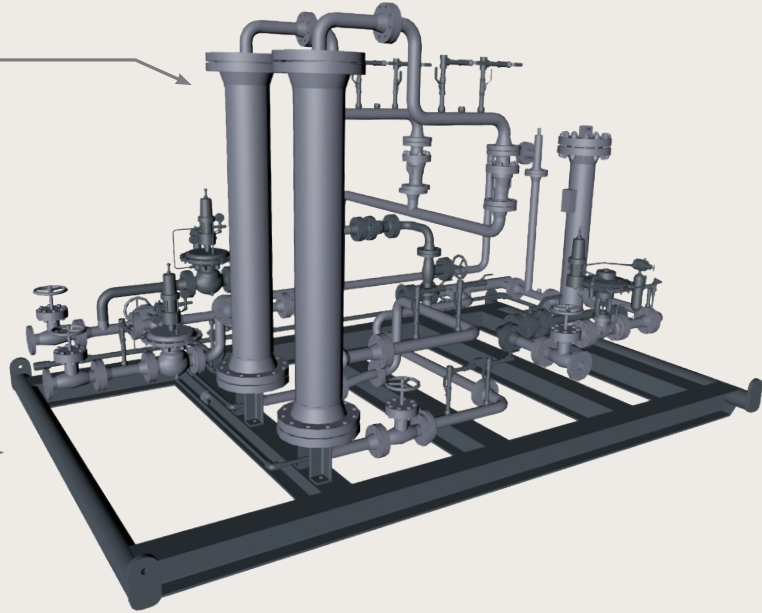

Membrane systems for natural gas treatment have been used since the 1980s. Air Liquide's proprietary hollow-fiber technology offers these advantages:

- Membrane life of 5 years or more.
- Tolerant to solvents and chemicals.
- Minimal need for pre-treatment.
- Simple operation.

**FUEL GAS
CONDITIONING SKID**

8' X 12' SKID

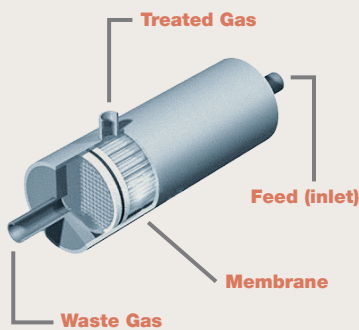

Compact and reliable,
membrane technology
is portable and more
cost-efficient

Advantages of Membrane Gas Conditioning

- Low cost
- Minimal maintenance
- Compact, small footprint
- Simultaneous removal of multiple impurities (H_2S , CO_2 and BTUs)
- Exceptional chemical and thermal resistance
- No pre-treatment required
- Can dehydrate gas in addition to removing heavy hydrocarbons
